Interface Converter Module

TO DCE (V.35)
TO DTE (RS-422)

DC to 256 kbps

ICM-3352

FEATURES

- Data Rate: DC to 256 kbps
- Supports asynchronous and synchronous operations.
- All data and clock signals are supported as well as most control signals.

DESCRIPTION

The ICM-3352 provides electrical conversions from V.35 signals at the Data Communication Equipment (DCE) to RS-422 signals at the Data Terminal Equipment (DTE) and vice versa as shown under "[TYPICAL APPLICATION](#)".

The unit is transparent to all handshaking protocols and can accept data, clock, and control signals up to a maximum rate of 256 kbps. FiberPlex recommends "R" units for high security applications because the units have added shielding and filtering to suppress their RFI.

LED INDICATOR		
Label	Color	Description
PWR	Green	Power supply in ICM unit is operating properly.
	Off	No power from the WTM power supply or open fuse inside the ICM unit. Check that the WTM power supply is operating properly. If the WTM power supply is good, separate the ICM unit from the WTM power supply for 30 seconds and then reattach so that the fuse inside the ICM unit has time to reset. If the PWR led is still off or not constant, replace the ICM unit.
